

AN INNOVATIVE MODEL

to develop, operate, accelerate renewable gas

**Organic waste recovery
& renewable gas**

*Securing waste deposits
Energy production*

**Containerized
data centers**

*Self-consumption
Digital storage*

**Performance
management**

*Markets monitoring
Production supervision*

**Territorial
anchoring**

*Local units
Circular economy*

MODULAR AND SCALABLE UNITS

to maximize the value of renewable gas and the flexibility of its uses

**ORGANIC
WASTE**

*Diversify and secure
deposits*

**RENEWABLE
GAS**

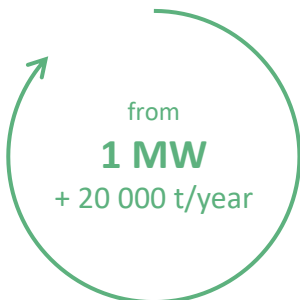

*Produce green and
controllable energies*

**ENERGIES
MANAGEMENT**

*Monitor markets and
manage production*

**DIGITAL
ASSETS**

*Generate value for
wasted energies*

*Unit capacity
of our facilities*

*Local set-up and
regional integration*

*Carbon avoidance
and offsetting*

*Datafarm Energy finance
and operate the facilities*
